

**Automated Visual Testing** 

A Point of View by Biswajit Guha

## Overview

Support for over 50 frameworks & languages

Integrate with popular source control

Hooks into existing DevOps toolchain & workflows

AR/VR/MR apps

Screens are tested via the **Visual AI** to instantly spot functional & visual regressions

\*Enterprise plans are available for dedicated cloud and on-prem installations Easy to read dashboards &auto-maintenance features save hours in triage time.

Jira Software

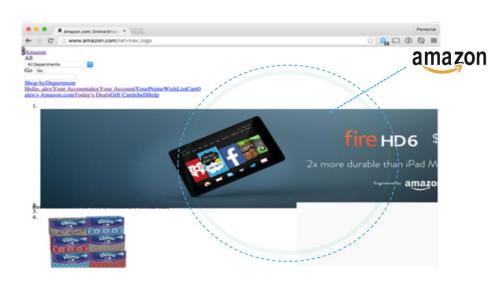

Integrations with popular defect tracking platforms make logging bugs fast & easy.

## Traditional Functional Testing vs Applitools Visual AI

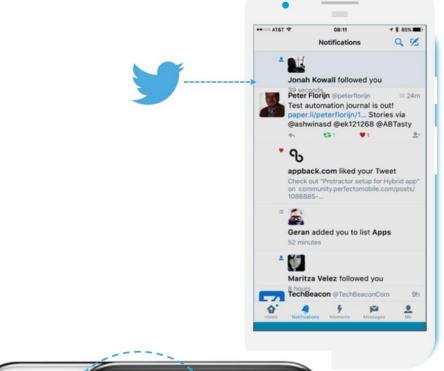

Applitools Visual AI can identify functional as well as UI issues in a web page

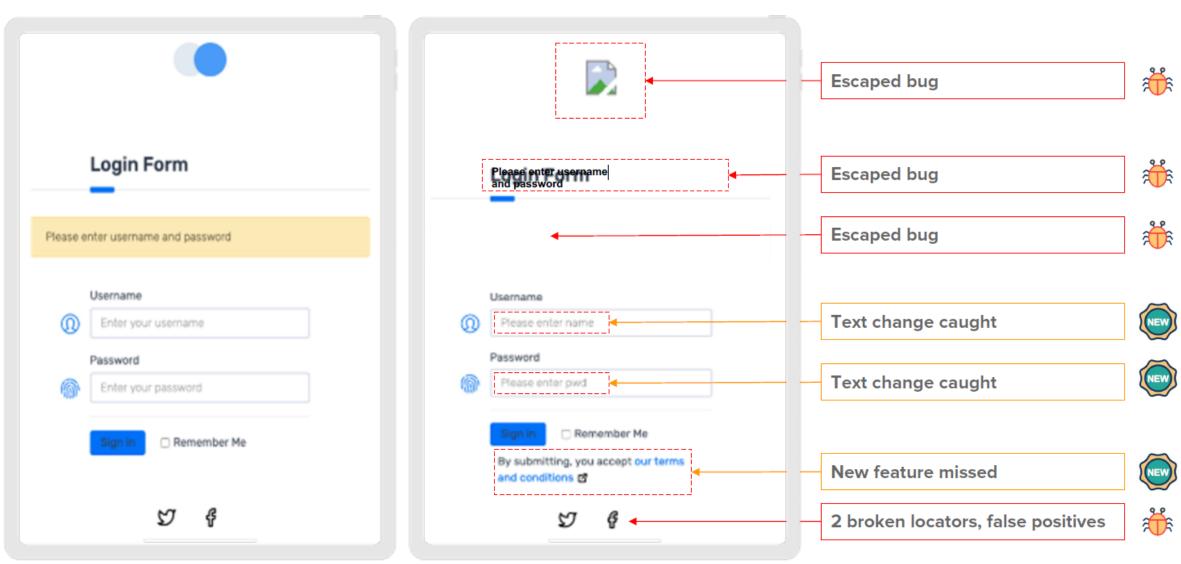

## Traditional Functional Testing vs Applitools Visual AI

Applitools Visual AI can identify functional as well as UI issues in a web page

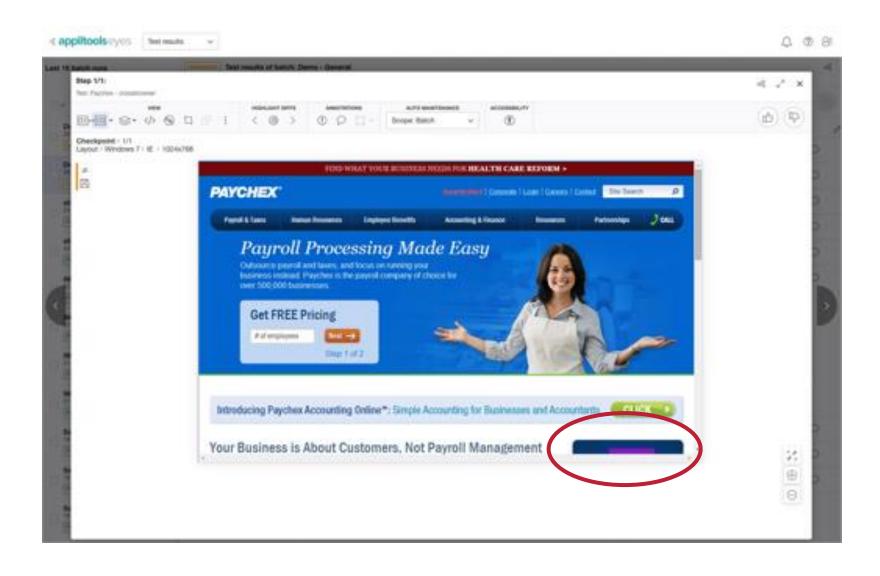

Original UI New UI

## Traditional Functional Testing vs Applitools Visual AI

Visual AI detects bugs, not browser render diffs

# Visual Testing Advantages

A single assertion for complete functional coverage.

Bonus: Validates the UI

Does not break when the UI changes

No coding skills required to maintain baselines

Root cause analysis

50+ SDKs to integrate with your Automated Functional Tests

Supports testing on multiple browsers and different viewport sizes

```
describe('Testing our login screen', () => {
   it('properly warns on missing input', () => {
      cy.visit('https://applitools.com/users/login');

   cy.get('button[type=submit]')
      click();

   ky.get('.validation-error')
      .eq(0)
      .should('contain', 'Required');

   cy.get('.validation-error')
      .eq(1)
      .should('contain', 'Required');

   cy.get('button[type=submit]')
      .should('contain', 'Sign in');

   });
}
```

```
config.addBrowser(800, 600, BrowserType.CHROME);
config.addBrowser(700, 500, BrowserType.FIREFOX);
config.addBrowser(1600, 1200, BrowserType.IE_11);
config.addBrowser(1924, 768, BrowserType.EDGE_CHROMIUM);
config.addBrowser(800, 600, BrowserType.SAFARI);

// Add mobile emulation devices in Portrait mode
config.addDeviceEmulation(DeviceName.iPhone_X, ScreenOrientation.PORTRAIT);
config.addDeviceEmulation(DeviceName.Pixel_2, ScreenOrientation.PORTRAIT);
```

# Supported Testing Use Cases

### Web Testing

More test coverage with lot less code.

### Visual Testing

Applitools Visual AI allows visual regression tests to perform both visual & functional testing for all areas in which functionality is rendered in your applications UI.

### Mobile Testing

Supports testing of Native Apps, Responsive Web Apps, Hybrid Apps for both Functional and Usability testing.

### PDF Testing

Applitools will monitor folders and instantly scan PDF files to verify them against established baseline.

### Accessibility Testing

Applitools Contrast Advisor can detect contrast ratio in images as well as native mobile applications for a more comprehensive analysis across all screens. Contrast Advisor can adhere to both WCAG 2.0 and the newer 2.1 standards

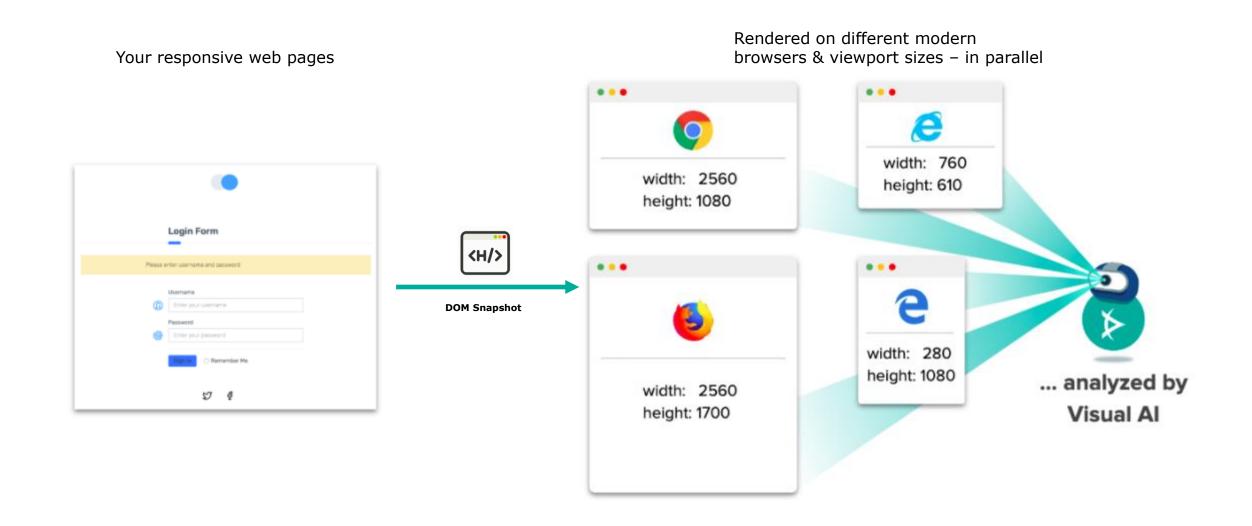

### Responsive Design Testing

Responsive design (RWD) is used to render a webpage to a variety of screens and screen sizes taking advantage of that particular screen sizes real estate.

# Features & Capabilities

### **Cross-browser Testing**

# Features & Capabilities

### SDKs & Integrations

#### Selenium

JavaScript, Java, C#, Ruby, PHP and Python

#### Selenium IDE

Codeless Selenium Read more on Selenium IDE

#### Watir

Web application testing in Ruby

#### **Appium**

Native & Web SDKs for JavaScript, Java, C#, PHP, Python, Ruby

#### Cypress

JavaScript end-to-end testing framework

#### Storybook

Support includes: Storybook React, Angular, and Vue

#### **Protractor**

End-to-end test framework for Angular & AngularJS apps

#### Espresso

Native framework for Android automated testing

#### Robot Framework

Keyword driven test automation

#### WebDriverIO

Next-gen browser and mobile automation framework for Node.js

#### TestCafe

Node.js end-to-end web testing

#### Playwright

Node.js library to automate Chromium, Firefox, and WebKit

#### PDF

ImageTester runs visual tests on PDF files and images

### **Ecosystem Integrations**

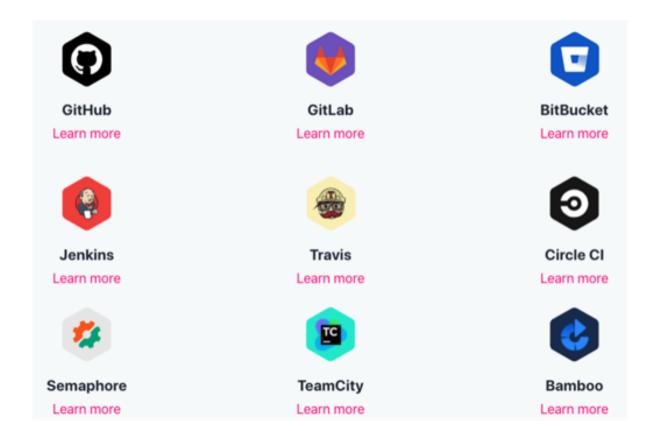

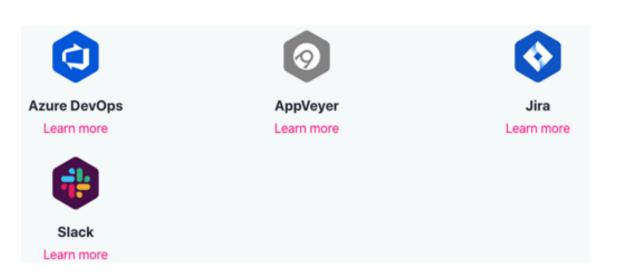

# Features & Capabilities

### Integrations with popular Source Control, CI/CD

### About Sogeti

Sogeti is a leading provider of technology and engineering services. Sogeti delivers solutions that enable digital transformation and offers cutting-edge expertise in Cloud, Cybersecurity, Digital Manufacturing, Digital Assurance & Testing, and emerging technologies. Sogeti combines agility and speed of implementation with strong technology supplier partnerships, world class methodologies and its global delivery model, Rightshore®. Sogeti brings together more than 25,000 professionals in 15 countries, based in over 100 locations in Europe, USA and India. Sogeti is a wholly-owned subsidiary of Capgemini SE, listed on the Paris Stock Exchange.
